IN THE CLAIMS:

Claims 1-19 (cancelled).

Claim 30 (new): A process for making a paper, the process comprising the steps of:

providing a sheet having a first side and a second side wherein the second side is opposite the first side wherein the sheet is substantially flat and forms a plane;

connecting an antimicrobial layer to the first side of the sheet wherein the antimicrobial layer is made of polyethylene having silver zeolite;

connecting a water resistant layer to the first side of the sheet; and

scoring the water resistant layer wherein the water resistant layer is located between the antimicrobial layer and the sheet.

Claim 31 (new): A process for making a paper, the process comprising the steps of:

providing a sheet having a first side and a second side wherein the second side is opposite the first side wherein the sheet is substantially flat and forms a plane;

connecting an antimicrobial layer to the first side of the sheet wherein the antimicrobial layer is made of polyethylene having silver zeolite;

connecting a water resistant layer to the first side

2

of the sheet;

scoring the water resistant layer; and

connecting a paper layer to the water resistant layer wherein the paper layer is located between the antimicrobial layer and the sheet.

Claim 32 (new): A process for making a paper, the process comprising the steps of:

providing a sheet having a first side and a second side wherein the second side is opposite the first side wherein the sheet is substantially flat and forms a plane;

connecting an antimicrobial layer to the first side of the sheet wherein the antimicrobial layer is made of polyethylene having silver zeolite; and

connecting a plurality of water resistant layers to the first side of the sheet wherein the plurality of water resistant layers is located between the antimicrobial layer and the sheet.

Claim 33 (new): A process for making a paper, the process comprising the steps of:

providing a sheet having a first side and a second side wherein the second side is opposite the first side wherein the sheet is substantially flat and forms a plane;

connecting an antimicrobial layer to the first side of the sheet wherein the antimicrobial layer is made of polyethylene having silver zeolite; and

3

adhering a paper layer to the first side of the sheet wherein the paper layer is located between the antimicrobial layer and the sheet.

Claim 34 (new): A process for making a paper, the process comprising the steps of:

providing a sheet having a first side and a second side wherein the second side is opposite the first side wherein the sheet is substantially flat and forms a plane;

connecting an antimicrobial layer to the first side of the sheet wherein the antimicrobial layer is made of polyethylene having silver zeolite;

adhering a plurality of water resistant layers to the first side of the sheet; and

adhering a paper layer to the sheet wherein the plurality of water resistant layers are located between the antimicrobial layer and the sheet.

Claim 35 (new): A method for using a paper to protect against contamination, the method comprising the steps of:

providing a sheet having a perimeter wherein the sheet has a bottom surface and a top surface wherein the top surface is opposite the bottom surface wherein an antimicrobial surface substantially covers the top surface and further wherein the sheet is made of a paper having a weight range between sixteen and a half pounds and ninety pounds wherein the sheet forms a plane and

4

further wherein the antimicrobial surface is made of polyethylene having silver zeolite;

positioning the sheet on a surface wherein the bottom surface of the sheet is adjacent to the surface wherein the surface is a substantially flat surface wherein the sheet covers the surface;

positioning an object on the antimicrobial surface wherein the object is within the perimeter of the sheet wherein the object is separated from the surface by the sheet; and

separating a liquid from the object on the antimicrobial surface wherein the liquid is located on the top surface of the sheet.
